Sustainable Development Goals

With the rapid change in environment due to global warming and increasing inequality across the world, it has been recognized that growth is not enough to ensure the welfare of people. Sustainable Development Goals (SDGs) is a universal agenda to all countries. Sustainable Development Goals are a collection of 17 global goals which were developed after intensive public consultation and engagement with national government, civil societies and stakeholders around the world. These 17 Goals include areas such as climate change, economic inequality, innovation, sustainable consumption, peace and justice, among other priorities. The 17 SDGs comprise of 169 associated targets, which are interconnected in nature. The targets for each goal are accompanied with indicators that focus on measurable outcomes. Each target has defined monitoring indicators to measure progress towards reaching the target.

SDG India Index

With the objective of measuring the progress of SDGs and develop competitiveness among States and UTs, NITI Aayog has released two versions of SDG India Index till now. Based on the results of the SDG India Index, States and Union Territories (UTs) have been classified into 4 categories: Achiever, Front runner, Performer and Aspirant, where the 'Achiever' category represents the highest rank and the 'Aspirant' category represents the lowest rank.

SDG India Index 1.0: The first version of the Index i.e. SDG India Index Baseline Report, 2018 (SDG India Index 1.0) was released in December, 2018. The Index tracks the progress of all the States and UTs on a set of 62 indicators covering 13 SDGs (leaving out Goals 12, 13, 14 and 17, mainly because of paucity of data). As per the report, Rajasthan has been ranked as 'Performer' with 59 composite score in SDG India Index 1.0. The all India score stood at 57.

SDG India Index 2.0: It is the second version of the Index which builds upon its first version. It was launched in December, 2019. The Index has been constructed using 100 indicators that covers 54 targets across 16 goals barring Goal 17 due to the fact that the data for SDG 17 are not available. On the lines of the first version of the SDG India Index, States and UTs have been classified into 4 categories i.e. Achiever, Front runner, Performer and Aspirant in SDG India Index 2.0. As per the report, Rajasthan has been ranked as 'Performer' on Composite SDG India Index 2.0 with the Index Score of 57 whereas all India score stood at 60.

SDG Rajasthan Index

The SDG Index of Rajasthan aims to measure the performance of districts on the SDG's. Additionally, SDG Index can be broken down into goal level score in order to help understand what goals have been achieved and where more effort is needed. NITI Aayog's Methodology was used in computing these index and set of indicators chosen as per availability of district wise data in the state. Districts have been also classified into 4 categories: Achiever, Front runner, Performer and Aspirant, where the 'Achiever' category represents the highest rank and the 'Aspirant' category represents the lowest rank.

SDG Rajasthan Index 1.0:

The SDG Index has been developed using 31 indicators across 12 goals. The data is retrieved from publicly available sources for these identified indicators. These data were aggregated to develop individual SDG score for each district in Rajasthan, which is then used to develop the Sustainable development goals index for Rajasthan. For each goal, the SDG score ranges between 0 and 100, where 0 being the worst among the group and 100 signifying that all the targets for that goal/all goals have been achieved. District wise Status of composite scores and ranks of Rajasthan SDG Index 1.0 and 2.0 is available at annexure I.

SDG Rajasthan Index 2.0:

The SDG Index has been developed using 55 indicators across 13 goals. The data is retrieved from publicly available sources for these identified indicators. These data has been aggregated to develop individual SDG score for each district in Rajasthan, which is then used to develop the Sustainable development goals index for Rajasthan. For each goal, the SDG score ranges between 0 and 100, where 0 being the worst among the group and 100 signifying that all the targets for that goal/all goals have been achieved. District wise composite Rajasthan SDG Index 2.0 score and ranks are given in the table 1.

Methodology

The methodology used to calculate SDG Index is as follows:

- Priority Indicator selection and data collection:** Based on the data availability, 55 indicators are selected for developing the Sustainable Development Goals Rajasthan Index. Data collected on these indicators from government sources. The list of these indicators is given in table 3.

Table No. 3

S. No.	Goal	Detail of Indicator
1.	Goal 1	BPL Population (Rural)(%)
2.		Households with any usual member covered by any health scheme or health insurance (%)
3.		Persons provided employment as a percentage of persons who demanded employment under MGNREGA (%)
4.		JSY beneficiaries out of the total deliveries performed in public institutions and private accredited institutions (%)
5.		Number of homeless households per 10,000 households
6.	Goal 2	Children under age 5 years who are stunted (%)
7.		Pregnant women aged 15-49 years who are anaemic (11.0g/dl) (%)
8.		Percentage of children aged 6-59 months who are anaemic (Hb<11.0 g/dl)
9.		Children under five years who are underweight (weight for age)(%)
10.		Average Yield (in Kg/Hect.) Rice, Wheat & Coarse Cereals
11.		Gross Value Added in Agriculture per worker
12.	Goal 3	Percentage of Institutional deliveries (births in the past five years)
13.		Under-five mortality rate per 1,000 live births
14.		Coverage of Full immunization (%)
15.		Total case notification rate of Tuberculosis per 1 lakh population
16.		Percentage of currently married women aged 15-49 years who used any modern method of family planning
17.		Population Served by per Medical Institution
18.	Goal 4	Net Enrolment Ratio at Secondary (Class 9-10) school (%)
19.		Children in the age group of 6-13 who are out of school (%)
20.		Average Annual Drop-out rate at secondary level (%)
21.		Percentage of Performance of students of class 3, 5 and 8
22.		Ratio of Girl's to Boy's Enrolment: Grades I to V
23.		School teachers professionally qualified (%) (up to higher secondary)
24.		Percentage of schools with Pupil Teacher ratio is less than 30
25.		Percentage of Schools with Electricity Facilities
26.	Goal 5	Sex ratio at birth (females per 1,000 males)
27.		Rate of Crimes Against Women Per 100,000 Female Population
28.		Proportion of sexual crime against girl children to total crime against children during the calendar year
29.		Female Work Participation Rate
30.		Percentage of Female land Holdings to total land holdings
31.		Rate of Dowry cases per 1 lakh population

S. No.	Goal	Detail of Indicator
32.	Goal 6	Households with an improved drinking-water source (Rural) (%)
33.		Percentage of Households using improved sanitation facility (%)
34.		Proportion of schools with separate toilet facility for girls
35.		Percentage of blocks over-exploited
36.	Goal 7	Households electrified (%)
37.		Percentage of households using clean cooking fuel (LPG)
38.	Goal 8	Annual growth rate of GDDP per capita, (at constant price of 2011-12)
39.		Workforce participation Rate
40.		Number of Banking Offices per lakh of population
41.	Goal 9	% of Villages connected by Road to Total Villages
42.		Road Length(Per Square KM)
43.		Per Lakh Business Entity Registered in Business Registration Portal
44.	Goal 11	Urban households living in slums (%)
45.		% of Completed Houses to Total Sections Out of GEO Tagged (PMAY-G)
46.		People killed in road accidents per 100000 population
47.	Goal 12	Stage of Ground Water Extraction (%)
48.		Percentage use of nitrogen fertilizer out of total N,P,K, (Nitrogen, Phosphorous, Potassium)
49.	Goal 15	Percentage of forest area to total geographical area
50.		Number of wildlife crime cases registered during the year
51.	Goal 16	Murders cases per 1 lakh population
52.		Proportion of Crime against human body to total population
53.		Incidences of crimes committed against children per lakh population
54.		Percentage of birth registered out of expected birth under civil registration system
55.		Population covered under Aadhaar (%)

2. **Target Setting:** Use the targets set for each indicator in calculating the Sustainable Development Goals Index on the lines of NITI Aayog. Basically, target has been decided as laid down points:
- Targets decided by United Nations
 - Target decided by United Nations Agencies
 - As per SDG targets decided by GoI/NITI Aayog
 - As per SDG India Index 2.0
 - As per Average of high income Countries
 - Best performance District Value
 - Average of Best 3 Performance Districts

The details on the targets used are presented at **Annexure – II**.

3. **Normalization:** Since the indicators used in the construction of index have different units of measurement, the units are normalized in order to be able to compare different districts based on a variety of indicators. Normalisation transforms all data into dimensionless numbers. Normalization of the indicators is done using the formula used by NITI Aayog in the calculation of SDG India Index. For each indicator the normalised values range from 0 to 100. An indicator value of 100 means that the district has achieved the target in terms of that indicator. If a district scores more than 100 on an indicator i.e. it is doing better than the target set, then its value is capped at 100 the normalised. The district wise normalized capped score are presented at **Annexure – III**.

For positive indicators the normalised value of an indicator is calculated as follows:

$$Z = \frac{x - \min(x)}{T(x) - \min(x)} \times 100$$

Where:

Z is the normalised score for the indicator

x is the indicator value in raw data

min (x) is the minimum observed value of the indicator in the dataset

T (x) is the target value of the indicator

For negative indicators the normalised value of an indicator is calculated as follows:

$$Z = \left[1 - \frac{x - T(x)}{\max(x) - T(x)} \right] \times 100$$

Where:

Z is the normalised score for the indicator

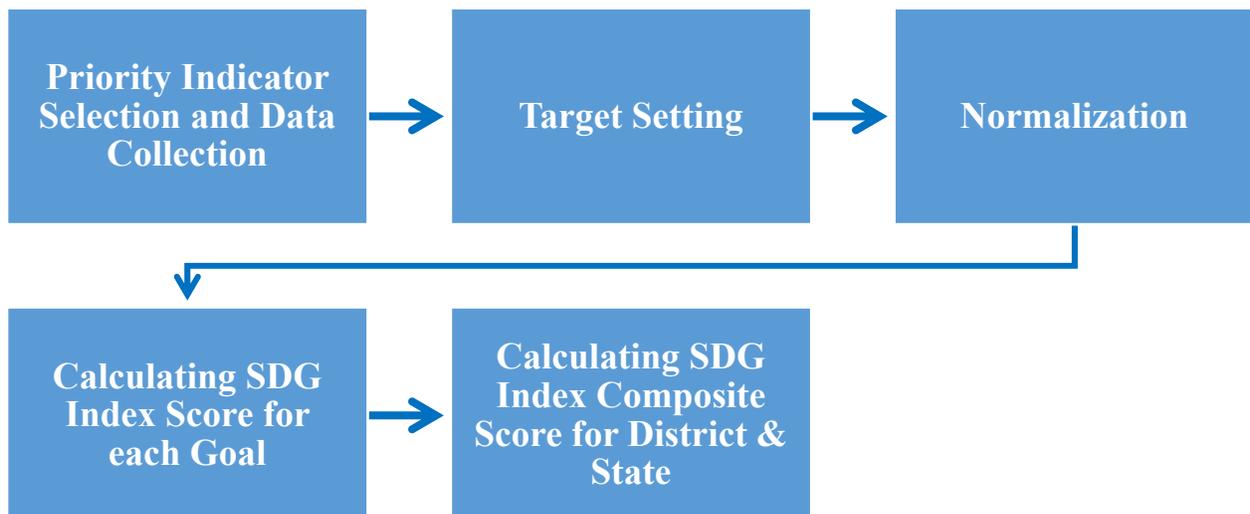

x is the indicator value in raw data

$\max(x)$ is the maximum observed value of the indicator in the dataset

$T(x)$ is the target value of the indicator

4. **Weighting:** Each indicator is assigned a weight, indicating the importance it has in influencing SDGs. Here, each indicator has been assigned equal weight. This is based on the assumption that each indicator has equal value for sustainable development.
5. **Calculating SDI score for each goal:** For each goal, the index value is calculated for each district by taking the arithmetic mean of the normalized values of all the priority indicators within a goal. The values for SDG score range in between 0 to 100 with 0 being the worst performer in the group and 100 being the achiever of the target. The details on goal wise scores for each district is presented at **Annexure – IV**.
6. **Calculating SDG Index score for a district:** Each goal is assigned an equal weight in calculating the SDI score for the district. For each goal, the SDG score range in between 0 to 100 with 0 being the worst among the group and 100 meaning that all the targets under that goal have been achieved. The list of goal wise indicators used in the preparation of SDI is already given in Table No. 1. The goal wise top 3 and bottom 3 districts are presented at **Annexure – V**.

7. Flow chart

Limitations of the Index

While Rajasthan SDG Index 2.0 is a useful instrument to judge the progress of the Districts in adopting and implementing the SDG agenda, this Index have the following limitations:

- The Index does not measure indicators of all SDGs owing to the unavailability of suitable data at the District level.
- A Larger number of indicators could not be included due to the unavailability of data at District level.
- The indicator set for Rajasthan SDG Index 2.0 is larger (55 indicators) compared to Rajasthan SDG Index 1.0 (31 indicators), therefore these indices are strictly not Comparable. There are 24 indicators which are common across the two indices. Further, given the comprehensiveness of the agenda, benchmarks will undergo continual change to meet the aspirations of SDGs.
- A case can be made to assign unequal weights to certain indicators. However, equal weights have been assigned, given the normative assumption that all SDGs are equally valuable.
